

## Canline: Automation End Line

### Automation End Line

As agents for Canline, Lift Hold and Separate Ltd can supply the whole range of services in end handling, in steel as well as in aluminium, from small conveying projects, individual components and spare parts, up to turnkey projects and regular service contracts.

We can offer complete tailor-made systems. We can design develop and manufacture automation equipment for the packaging industry. Both Canline and Lift Hold & Separate Ltd have over 5 decades' experience in the can making, can-processing, end-making, automotive and packaging industry. We can design, build, install, commission and support conveying systems to ensure customers productivity, optimize lay-out requests by visualisation of material and product flows.

Various conveyors and machines intended for aluminium beverage ends:

- Synchronizers (photo 1)
